**What is Your Productivity Forecast?**

*Sharon Sorenson,  
Heartland Organizing*

Unproductive climate in the office?  
Paper blizzard in progress?  
Data fog on your computer?  
Save space, time, energy and sanity.

She was an organized child. She was an organized student. She was an organized teacher and librarian. All she ever heard was “you should help people get organized.”

So...she did. Heartland Organizing, LLC came into being as the place for Sharon to use her natural talents, training, and experience to do what she is extremely good at and what she truly loves to do.

Sharon has a Master’s Degree in Information Media/Library Science. She is a member of the National Association of Professional Organizers (NAPO) and is active in the Minnesota Chapter. She is also a Certified Productive Environment Specialist, having been personally trained by nationally known organizing and productivity expert, Barbara Hemphill.

She understands both the art and science of productivity – using systems that have stood the test of time. For over eight years she has helped overwhelmed business executives save money and achieve balance in an increasingly demanding world.

2:15 p.m.

For  
all staff
